Please ensure to read the Caveats provided below.

<u>Detention period</u>: All statistics related to number of persons detained or the number of detentions include the total number of persons in detention at <u>any time</u> during the reporting period. Therefore, the number may include individuals whose detention began before the reporting period and/or who were released during (or after) the reporting period.

<u>Duplicate counts of the same person</u>: The summary rows of this report must be used to identify the actual number of detainees in a fiscal year. It is not possible to add up the count of each row to determine the total number of detainees as the same person can be detained in multiple facilities due to facility transfers, can be detained under multiple grounds and the detention period can overlap the three fiscal years included in this report. E.g.: A person may initially be detained in facility A and be transferred to facility B and would be counted twice in the details. The same applies for grounds (person detained for examination and the ground changes to Identity). Therefore the total for each element in the details of the report will be higher than the total number of persons detained in the summary rows of each group and the overall summary row, which is the actual number of persons detained.

<u>Detention days:</u> Detention days are the number of cumulative days spent in detention for all detainees over the reporting period under the provisions of the Immigration Protection Act found at this location https://laws.justice.gc.ca/eng/acts/i-2.5/section-55.html
